How to go about it?

Handbook and films for reference

The appreciated Tormek handbook explains the basics of edge tool sharpening, gives you useful tips and an easy, step by step approach to the Tormek method of sharpening. It is delivered with each Tormek machine together with the Tormek DVD.

TNT-300 Woodturner's Instruction Box
Contains TNT DVD film and detailed Handbook. Shows how to shape, sharpen and hone all your turning tools. (Sold separately or as part of the TNT-708 kit.)

Price often indicates quality, and we certainly found that to be true in wet sharpeners. Tormek's heavy-duty T-7 proved impossible to stall, no matter how hard we pressed on the tool during sharpening; none of the lower-priced units even came close. Its tool-holding system (tool rest and holders) fit together like hand in glove and gave us dead-on bevels and square ends with little fuss.

Dave Campbell with John Olson
WOOD Magazine, USA

I have yet to find anything that cannot be sharpened on the Tormek. The honed edge is incredibly fine, and coupled to this dramatic improvement in edge quality is the not insignificant fact that the tools will last far longer, as the sharpening process is so much less aggressive. I am now a total convert to the wet grinding system. It really is Touch and Turn, but you touch far less often and turn far more!

TORMEK®

✓ **Sharpen all your edge tools**
With the wide range of Tormek patented jigs, you can sharpen practically all types of edge tools. Tormek is dedicated to developing water cooled sharpening through innovative solutions!

✓ **Exact replication**
The key word when sharpening the Tormek way is *repeatability*. You can shape the tool exactly to your needs. Even complicated shapes such as fingernail turning gouges, spoon carving gouges and oval skew chisels with a radiused edge are easily sharpened.

✓ **Cleanest edges**
You finish the sharpening process by honing and polishing the edge on the leather honing wheel. You get a razor sharp edge.

✓ **Fast sharpening**
Once the shape is created, you remove only a fraction of the steel when re-sharpening, which makes it a quick job.

✓ **Full control**
At the low speed, you have full control of the sharpening and remove no more steel than necessary. An extra benefit is that your tools last longer.

✓ **No risk of overheating**
There is no risk that the edge becomes overheated and loses its hardness.

✓ **Safe and quiet**
Worn steel particles are deposited into the water trough, keeping the air clear of grinding dust. No sparks are produced that can be a fire hazard in workshops with a lot of wood dust. You will also find that the Tormek runs surprisingly quietly.

✓ **Quality and performance**
Buying a Tormek is a safe investment in quality and performance with a 7 years warranty. You are assured that all future developments will fit your machine.
